Static wikis versus Dynamic wikis

David Arroyo Menéndez

BSC

Dynamic Wikis is the winner

Static wikis

You can modify text in local with a simple text editor and share the documents with a control version system.

Examples: orgmode, ikiwiki, jekyll, etc.

Orgmode

- Manage TODOs

- Create papers

- Create presentations

- Create spreadsheets

- An format to support any language

- An format to support hyperlinks to your personal stuff

Orgmode Personal Experience

- All stuff in my personal website
- org-license
- org-effectiveness
- Beamer presentations

Ikiwiki

- You can modify online without a database

- You can modify offline and manage changes with a control version system

- I was using ikiwiki to libremanuals a project to launch translated printed books about free software.

Jekyll

- You can modify without a database and share your data with github

- It's a ruby on rails idea

Conclusions

- Dynamic wikis is good to large sites with all kind of people.

- Static sites is an advantage to programmers users by:

    - Security

    - To choose the text editor

    - Personal reasons
